

Recycle your old electricals.

Electrical items with a plug, battery or cable need electrical recycling.

What can you recycle?

Computers, screens, printers, kitchen appliances, power tools and cables. Keep them together for your electrical recycling collection.

Keep electricals out of normal bins

Do not put electrical equipment, vapes or batteries in general waste or ordinary mixed recycling.

Keep batteries and lamps separate

Use the correct containers for lamps and loose batteries. Tell your waste collector about damaged or contaminated equipment before collection.

Recycle today. A cleaner tomorrow.
