

A plug, battery or cable? Recycle it as electrical waste.

Big or small - it is still electrical

Computers, screens, printers, kettles, tools, phones and cables all need electrical recycling when you no longer want them.

Use your electrical recycling point

Keep electrical items out of general waste and ordinary recycling bins. Check which container your workplace uses.

Keep loose batteries and lamps separate

Use the right collection for loose batteries, bulbs and fluorescent tubes. Do not force batteries out of sealed devices.

Recycle today. A cleaner tomorrow.
