

Separate waste. Make recycling easier.

Workplace guidance for England. Other UK nations have different rules.

Keep the main streams separate

Separate food waste, dry recyclables and residual waste. Paper and card normally have a separate collection from plastic, metal and glass; a collector may use a documented co-collection assessment.

Make each bin easy to recognise

Label bins clearly and check what your collector accepts. Keep electricals, batteries and hazardous waste separate.

Check which deadline applies

England's workplace rules began on 31 March 2025. Micro-firms with fewer than 10 full-time equivalent employees have until 31 March 2027. Check the linked official guidance for details.

Recycle today. A cleaner tomorrow.
